Nominator: Archie Resue

Jeremy Varga, Daniel Jones, Jon Heliseva, Melissa Auble, and Matthew Whittaker quickly, effectively and professionally managed to rough-in the electrical and compressed air system for a temporary air compressor to serve the entire CVM complex. Through a string of failures in the Control Air, Lab Air and Hospital Air the complex was at a critical need to quickly implement the FE design to supply all 3 systems and prevent catastrophic loss to building, research and animal care. They worked with other areas to permit, prep, core holes, deliver ladders and scaffolding; rough-in pipes and conduit; coordinate changes and safety inspections while communicating with FE, ZFM and Building Managers as needed. They completed all final connections and coordinated with rental unit vendor. The team worked smoothly, neatly and safely to meet the request to have the unit running prior to Thanksgiving Break!

**Jeremy, Daniel, Jon, Melissa and Matthew were
nominated by Archie Resue.
The award was virtually presented by Rick Burgess.**
