EMPLOYEE OF THE QUARTER

Wing Hall Flood Recovery Team—
not all members in photo

June 2018
The work done on this flood recovery is an excellent example of FCS teamwork and dedication.

On Sunday evening, of January 7th, a sprinkler pipe on the fourth floor of Wing Hall burst, pouring thousands of gallons of water from the fourth floor to the basement. Drop ceiling tiles on the floor, plastered walls and ceilings crumbling, floor tiles peeling up, carpets soaked and stained. Staff unselfishly came in to work on Sunday for cleanup and repairs. By the end of Monday so much was accomplished in removing debris that there was talk of the building being ready for the first day of classes. CALS management, maintenance management, shop FGPs and FPs put a plan together. Carpenters, plumbers, painters, electricians, masons, TAs, MAs and building care all worked together, weekends in some cases, to meet a grueling schedule. Lights, ceilings, floors, walls, carpets all demoed, replaced and cleaned in weeks not months. The building opened for the first day of classes with only minor inconvenience to students and staff.

Congratulations TEAM!
