

Appendix

The consolidated development parameters matrix contains key development guidelines for all potential building sites identified in the plan. It prescribes the following:

- total area of each development parcel
- maximum coverage for each parcel, i.e., how much of the site area may be occupied by a building or buildings
- appropriate minimum and maximum building heights
- range of total gross building square footage appropriate for the site, based on the coverage and height guidelines
- range of housing units that may be achieved on sites where residential uses are appropriate
- Enabling Projects - projects that must be undertaken prior to new development occurring on the site, the relocation of an existing use being a common example
- Concurrent Projects - initiatives that should be undertaken in conjunction with building development on the site, for example, landscape and infrastructure projects

Mapping of the development parcels, additional development guidelines, and information on Enabling and Concurrent Projects are contained in the Precinct and Zone plans.

Development Parameters Matrix – Core Campus

Parcel	Parcel Footprint (ft ²)	Building Footprint (ft ²) % Parcel Coverage	Height (range in stories)	Potential GSF (range in ft ²)	Potential units per acre (residential)	Number of Units (residential)	Permitted Uses (required uses in bold)	Enabling Projects	Related Projects
Zone C01 – The Arts Quad									
Parcel 1A	8,700	8,700 100%	4 (match Olive Tjaden Hall)	34,800 – 34,800			<ul style="list-style-type: none"> Academic below-grade parking
